Comments

(Set forth by above question #, if applicable.
Use "Additional Comments" Sheet, if needed)

File #: 91-140060

#1. It cannot be determined from the documentation if the tests were performed in a scientifically acceptable manner.

#2. The results are not adequately documented in the notes. The notes are not dated, are in pencil and not ink and use abbreviations that are difficult to interpret (such as "M-dk dist, lt indist, lt dist" and "cut-ssp" to describe some of the characteristics of the hair):

The technician's notes do not indicate the recovery of any hair from Q2.

Apparently, a confirmation of the hair match was made by a second examiner (ZJ). The qualifications of ZJ are not known.
